-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 30 January 2002.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Claim Objections

1. Claim 18 is objected to because of the following informalities: Claim 18 has typographical errors, since it seems the term "the or" at lines 8-9 is not needed.

Appropriate correction is required.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102(e) that form the basis for the rejections under this section made in this Office action:

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

3. Claim 18 is rejected under 35 U.S.C. 102(e) as being anticipated by Iouras et al. (U.S. 6,445,707), hereinafter referred to as Iouras.

Regarding claim 18, Iouras discloses broadcast rate control allocation (BRCA) for congestion avoidance in satellite ATM network.

In Iouras the satellite 10-fig.1 employs a close-loop control or feedback to control the rate of the input of the satellite to avoid congestion, see col. 14, lines 26-44.

a) measuring the rate of output data flow from the device at an output section of the device (In downlink channel, the on-board switch of the satellite broadcasts a fair

rate at which the user terminal 1-fig. 3 requested. In other word, the data rate at the output section 36 is measured, see col. 15-line 66 to col.16-line 9)

b) transmitting the rate of output flow from the output section to at least one input section (depending on the rate adaptation being broadcast from the satellite to the user terminal, the user terminal in the uplink channel can either request the rate adaptation to be at increase, decrease or no change); *and*

c) adjusting the rate of input data flow at each input section based on the rate of output data flow (Based on the received request from the user terminal, the on-board switch of the satellite broadcasts the requested rate to avoid the congestion).

Allowable Subject Matter

4. Claims 1-17 are allowed.

Conclusion

5. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Fan et al. (US 2002/0122428); Jones et al. (US 2003/0058802); Greeberg et al. (US 6,003,062) are cited to show feedback priority modulation rate controller, which is considered pertinent to the claimed invention.

6. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Duc Ho whose telephone number is (571) 272-3147. The examiner can normally be reached on Monday through Friday from 7:00 am to 3:30 pm.
